

Choosing Collection Models

Please let us know what collections models you would like.

Complete this form by following the steps below:

1. Select which collections model you would like for each type of material. **You can only select one collection model for each material type.**
2. You will see a quantity range – this indicates the range of how many items of each material you can get in a collection. For floating collections, this is a starting collection; for in-house, this is the quantity that will be housed in your library for one year. Indicate the quantity you would like to receive in the last column. Please choose numbers in the 5s and 10s (ie: 25 or 50). If you indicate a figure below or above (ie: 12 or 52) we will round it up or down accordingly.

Please complete this form and return to Marisa Iacobucci by Monday, September 28, 2009.

Select one collection per material type.				
Material Type	Quantity Limits	Floating Collection	In-Library Collection	How many would you like?
BOCD	20-25			
DVD	25-50			
E	25-50			
ER	10-25			
LT	25-50			
SP-E	5-100*			
YAF	25-50			

*Amounts may be adjusted based on the number of libraries interested in this collection.
